Eaton showcases breadth of Robust, Reliable and Efficient Power Management Technologies for the construction segment at EXCON 2019

- Eaton launches 4 new hydraulics products at EXCON 2019

Shandar Alam, Managing Director vehicle and Hydraulics, Eaton, India

Power management company Eaton this year, participated at the 10th edition of EXCON – the largest construction equipment event in South Asia at BIEC, Bengaluru from December 10-14, 2019. During the Expo, Eaton also announced the introduction of four new Hydraulics products for the Indian Market – X70 closed circuit piston and plug in motor, Steering unit 5SQ, Eaton Spiral hose EC640 and Cast Iron piston motor 743XX. The new products introduced provide customers and end users with Robust, Reliable and Efficient power management for applications that demand higher pressure and operate under arduous conditions.

Commenting on Eaton's participation at EXCON 2019, Shandar Alam, managing director, Vehicle and Hydraulics – India, Eaton said, "EXCON is one of the largest congregations for players from the construction equipment and construction technology industry in India. Platforms like these are instrumental in enabling businesses to explore the latest product and technology trends in the industry. This year, our participation here exhibits Eaton's commitment to deliver Robust, Reliable and Efficient solutions for the construction segment."

The uniquely designed booth of Eaton's showcase at this year's EXCON provides for comprehensive product demos, opportunities to physically touch and feel the products, digital overviews to communicate product specifications, features and benefits, which together reflect Eaton's distinct power management capabilities and foster tailored interactions that help Eaton design, engineer and build better, smarter machines.

During the 5-day EXCON 2019 expo, Eaton's technology showcase includes a diverse range of products for construction segment, which includes all piston product portfolios, the various electro-hydraulic products such as the HFX range of electronic controllers and VFX display, along with state of the art CMA valves. In addition to our wide range of hydraulic products for backhoe loaders, skid steer loaders, compactors, scrapers, dozers, concrete mixers, boom pumps, wheel loaders, commercial vehicles, cranes, mining equipment, we will also showcase our solutions for excavator application, which include the main pump, swing motors, track drive motors as well as hydraulic remote controls. In addition, Eaton is also showcasing Robust, Reliable and Efficient power quality and power distribution products for varied industry segments.

Talking about the newly introduced products by Eaton at EXCON 2019, Alam said, "As the hydraulics industry adapts to ever changing product and machine designs, Eaton continues to develop innovative ideas and introducing newer ways to our customers be more productive and efficient. Eaton's X70 closed circuit piston and plug in motor, Steering unit 5SQ, Eaton Spiral hose EC640 and Cast Iron piston motor 743XX not only meet the emerging industry demands but also deliver progressive design solutions to address high pressure jobs and tough condition requirements at ease. Distinctly advanced in terms of performance, functionalities and capabilities, these new products are designed to address the emerging technology needs of a range of applications in industries such as Construction, Agriculture, Mining and others."

Eaton is a power management company with 2018 sales of $21.6 billion. We provide energy-efficient solutions that help our customers effectively manage electrical, hydraulic and mechanical power more efficiently, safely and sustainably. Eaton is dedicated to improving the quality of life and the environment through the use of power management technologies and services. Eaton has approximately 100,000 employees and sells products to customers in more than 175 countries. For more information, visit Eaton.com.
