

JIG CLAMPS - Precision Attachments Driving Power and Productivity

JIG CLAMPS is a specialized manufacturing company focused on producing equipment accessories for the agriculture and infrastructure industries, with a particular emphasis on attachments for Skid Steer Loaders (SSLs). Headquartered in Vadodara, Gujarat, the company operates state-of-the-art manufacturing facilities spanning over 15,000 square feet. These facilities include dedicated fabrication, CNC, and tool rooms equipped with advanced machinery, all strategically located within the GIDC industrial area of Halol in the Panchmahal district, enabling efficient production and distribution

Palikas, and government defense departments across India.

Attachments manufactured by JIG CLAMPS are engineered to enhance the versatility and operational efficiency of SSLs by utilizing the hydraulic power of the loader. These attachments enable the machine to execute a diverse range of tasks including lifting, digging, cutting, channeling, and demolition. By transforming a single machine into a multi-purpose tool, these attachments reduce the need for multiple specialized machines, thereby enhancing cost-efficiency, minimizing inventory and space requirements, and maximizing productivity.

technical experts dedicated to delivering durable, high performance attachments that improve safety and productivity at construction sites, infrastructure projects, and agricultural operations. The company has built a strong reputation for its customer-oriented approach, ensuring prompt after-sales service and strict compliance with international quality standards.

The target clientele includes:

- OEM Skid Steer Manufacturers
- OEM Dealers across states in India
- Dealer Sales Executives and Engineers for inquiry

principles:

Innovation & Quality:

Design and manufacture high-performance products that meet stringent international standards.

Customer Focus: Deliver exceptional service and reliable support to ensure customer satisfaction.

Safety & Productivity:

Enhance worksite safety and efficiency through durable, technologically advanced designs and manufacturing processes.

Commitment to Excellence:

Continuously improve operational processes, integrate evolving technologies, and upgrade workforce skills to provide superior products and

allows the **Mr. Jitesh Patadiya** maintain sustainable growth and uphold its commitment to delivering value-driven solutions tailored to diverse client needs.

In summary, JIG CLAMPS stands as a front-runner in manufacturing specialized attachments that elevate the operational capacity of skid steer loaders. Its unwavering focus on innovation, quality, and client satisfaction positions the

across India.

Founded in 2021, JIG CLAMPS initially focused on developing specialized clamping devices for automobile and engineering sectors. Guided by CEO Mr. Jitesh Patadiya, who boasts over 25 years of experience with leading earthmoving companies such as L&T, CNH, Terex, Aquarius, and Manitou, the company rapidly expanded its capabilities. By 2023-24, JIG CLAMPS diversified its portfolio to include the design, manufacture, and supply of attachments and spare parts specifically for Skid Steer Loaders, establishing a broad client base spanning dealers, municipal corporations, Nagar

The company offers a range of universal attachment models which can be seamlessly integrated with leading SSL brands such as TEREX-VECTRA, BOBCAT, MANITOU, JCB, CASE, and CAT.

Looking ahead, JIG CLAMPS is investing in the development of new attachment types including Rock Buckets, Telehandlers, and Work Platforms, reflecting its commitment to innovation and market responsiveness.

JIG CLAMPS prides itself on its dedication to innovation, superior quality, and reliability. The company employs a highly skilled team of engineers and

generation

- Existing Skid Steer Loader owners
- Municipal Corporations and Nagar Palikas (via GEM tenders)
- Government Institutions including Defense, Para-Military, NDRF, and SDRF
- Power Plants, Cement Plants, and Ports

The **vision** of JIG CLAMPS is to establish a leadership position in manufacturing innovative and reliable attachments for construction, infrastructure, and agricultural machinery.

The company's **mission** is driven by the following core

services.

By converting skid steer loaders into versatile multi-purpose machines, JIG CLAMPS enables clients to optimize asset utilization, reduce capital expenditure, and enhance worksite productivity. The company's universal attachment solutions provide customers with flexibility and cost savings, aligning with evolving requirements across agriculture, construction, and infrastructure sectors.

JIG CLAMPS' comprehensive approach blends technical expertise, strategic product diversification, rigorous quality control, and exemplary customer service. This synergy
