

GROWING TOGETHER

BKT to showcase Advanced Off-Highway Tyre Solutions at Bauma ConExpo India 2026

Visitors can explore BKT's latest tyre technologies developed for demanding construction, mining and industrial applications

Balkrishna Industries Ltd. (BKT), one of the leading tyre manufacturer in the Off-Highway industry, is set to participate in **Bauma ConExpo India 2026**, taking place from **September 15–18, 2026**, at the India Expo Centre, Greater Noida. As infrastructure development accelerates across India, productivity, equipment uptime and operational efficiency have become defining priorities for the construction and mining industries. Against this backdrop, BKT will showcase a portfolio of advanced tyre solutions specifically engineered to help customers navigate demanding operations while **reinforcing its commitment to Growing Together**.

Located at **Hall 12, Booth No. 1**, BKT's display will feature a range of application-specific tyres designed for some of the industry's most demanding environments. Among the highlights are the **EARTHMAX SR 30**, developed for loaders and articulated dump trucks, and the **AIROMAX AM 27**, engineered for mobile cranes with enhanced stability and load-carrying capability. The display will also

include a wide selection of solutions developed to cope with harsh operating environments, heavy loads and intensive operating cycles: among the highlights of BKT space are **MINE FORCE**, **EARTHMAX EXPERTO GD1**, **XL GRIP NEO**, **DYNA HAUL**, **CONSTEER** and **EARTHMAX SR423**. The showcase demonstrates the company's focus on enhancing equipment uptime, reducing operational disruptions and delivering reliable performance in some of the world's toughest working environments.

Commenting on BKT's participation, **Rajiv Poddar, Joint Managing Director, BKT**, said, "India's infrastructure sector continues to create new opportunities for innovation and growth. As customer expectations evolve, tyre technology plays an increasingly important role in improving productivity and operational efficiency. Bauma ConExpo India provides an important opportunity to engage with customers, OEMs and industry stakeholders while demonstrating how our solutions address these

evolving needs while creating long-term value. Guided by our philosophy of Growing Together, we remain committed to delivering high-performance tyre solutions that contribute to the future of infrastructure development."

The exhibition will provide visitors with an opportunity to explore BKT's latest tyre technologies, interact with the company's technical experts and gain insights into solutions tailored to their operational requirements.

Also, it reflects BKT's continued investment in engineering excellence and customer-centric innovation, supporting industries that are building the infrastructure of tomorrow.
