

L&T Partners with France's FAYAT Road Equipment to Market BOMAG's Specialised Road Construction Equipment in India

Larsen & Toubro's Construction & Mining Machinery business has entered into a partnership with FAYAT Road Equipment Division (FRED) India to market BOMAG's road milling machines, soil stabilisers and cement spreaders in India. The partnership encompasses marketing, sales, after-sales support and supply of spares.

FAYAT is France's largest independent construction group and a global leader in road equipment. BOMAG, headquartered in Germany, is a key part of FAYAT's Road Equipment Division and is recognised worldwide for innovative technologies and sustainable solutions for road construction and infrastructure development.

The partnership brings together BOMAG's globally acclaimed road construction technologies and L&T's strong customer relationships, alongside nationwide product support capabilities.

The specialised BOMAG range of equipment will complement L&T's existing Road Machinery portfolio, enabling

L&T to address a broader range of applications across road construction & maintenance and overall infrastructure development. Together, these products will enable L&T to offer the full range of road machinery to its esteemed customers.

Commenting on the development, Mr Anil V Parab, Senior Executive Vice President and Whole-time Director - Manufacturing, L&T, said: "Our Construction & Mining Machinery business has a long history of introducing advanced equipment technologies in India. In fact, we are the pioneers to introduce hydraulic excavators in India. The addition of BOMAG's specialised road construction equipment further strengthens this legacy".

"L&T's nationwide service network, supported by its central warehouse in Nagpur, will help ensure prompt technical support and dependable after-sales service throughout the equipment lifecycle. Together, L&T and FAYAT aim to enhance customer productivity, improve project efficiency and build a strong platform for long-term growth in the Indian market", he

added.

Mr Abhijit Som, Managing Director – FRED India, said: "India is a key strategic growth market for the FAYAT Group. As the country advances towards realising its vision of Viksit Bharat by 2047, continued investment in infrastructure will drive demand for advanced, efficient and sustainable road construction solutions. With a legacy spanning several decades and a presence in more than 170 countries, FAYAT is well-positioned to bring its global expertise and technologies to support this growth".

"The introduction of BOMAG's specialised road construction technologies in India, combined with L&T's extensive market reach, deep customer relationships and service infrastructure, creates a compelling synergy. The partnership will enable customers to access advanced and reliable equipment solutions backed by strong local support".

About Larsen & Toubro

Larsen & Toubro is a USD 32 billion Indian multinational engaged in EPC Projects, Hi-Tech Manufacturing, Products

and Services, operating across diverse domains and multiple geographies. With a strong impetus towards AI & technology, customer-focused approach and the constant quest for top-class quality have enabled L&T to attain and sustain leadership in its major lines of business for eight decades.

L&T Construction & Mining Machinery – one of the Company's oldest business divisions and part of its manufacturing vertical – markets, sells and supports a wide range of construction and mining equipment, including hydraulic excavators, dump trucks, surface miners, crushing solutions, apron feeders, wheel loaders, vibratory compactors, skid steer loaders and material-handling equipment. Backed by decades of industry experience, a nationwide service network and comprehensive product and parts support capabilities, the business serves customers across India's infrastructure, construction and

mining sectors.

About FAYAT Group

Founded in 1957, FAYAT is France's largest independent construction group and a global leader in road construction equipment. The Group operates across seven major business lines, including road equipment, civil works, foundations, buildings, energy services, metal and pressure vessels, with a presence in more than 170 countries.

Through its Road Equipment Division, FAYAT brings together some of the world's leading brands, including BOMAG, offering innovative, sustainable and high-performance solutions for road construction, maintenance and rehabilitation. Driven by a strong commitment to engineering excellence, innovation and customer support, FAYAT continues to deliver technologies that enhance productivity, improve infrastructure quality and contribute to sustainable development worldwide.
